## About Me

An outgoing and creative individual dedicated to enhancing my knowledge and understanding of the digital world in order to seize opportunities for a career in the industry.

My free time is spent developing my core skills in web development disciplines, resulting in a certificate in Responsive Web Design and current ongoing study in JavaScript and Data Structures. I have created several projects for my portfolio as evidence, highlighting my skill and competence in these areas.

My ability to provide high quality service to both organisation and customer, by maximising innovative business opportunities, has been proven consistently. Particularly during COVID 19 where I was responsible for new marketing and delivery of ideas within the hospitality industry.

I am experienced in leading a team, managing my workload to meet deadlines and prioritising crucial tasks whilst maintaining high personal and professional standards.
